

**Suggested connection of a HandPunch and a Network Adapter to a single
12V boxed power supply**

The picture below shows the power connection at the rear of the HandPunch terminal. The connections are Pin 1 is +12V DC, Pin 2 is 0V.

Connection information is also available on the rear of the Hand punch terminal.

The following shows a 12V boxed power supply unit, where the HandPunch and Network Adapter are both connected to the 12V DC output.

The Red/Yellow from the HandPunch **AND** the Black with White stripe from the Network Adapter should both be connected to + (plus) on the power supply pcb.

The Black/Blue from the HandPunch **AND** the Black (no stripe) from the Network Adapter should both be connected to – (minus) on the power supply pcb.
