

## Focus New Features and Modifications

Focus Version	Details
3.003	The Fire Group field is now located in the Groups Tab under Employee Details.  Duplicating an Employee now also duplicates the Access Group and Fire Group values.
3.004	A Daily Rule can be opened by Right-clicking on the rule from within a Work Schedule.
3.007	Hanvon Face Reader terminals now have their Daylight Saving function automatically applied when a Get Status is performed with Clock Utilities.  A new holiday year can be generated for an employee within Employee Details – Holidays by using the New button.
3.009	Workflows can now be created to monitor specific Exception Types. This feature is very useful to help highlight to department managers what manual actions are currently outstanding, e.g. resolving missing clockings, missed target hours etc.
3.010	Suprema Biomini USB Fingerprint reader now supported to allow employees to be enrolled at a PC (rather than an actual clocking terminal). Enrolment also shows the quality of the enrolment scans which can help reduce clocking problems. This new feature is currently in Beta test stage.  Workflow emails can now append the Green, Amber, Red status and also the Count values to the subject of the email. This is very useful to help create more filtered recipes in IFTTT.
3.018	Within System Setup, a new field to allow the Maximum Shift Length to be set. This was previously set within Clock Utilities (and actually still is when using HRX Terminals – though it now only sets this value within the terminal and not the Timesheet). Individual employees maximum shift allowances can still be set as previously – within Employee Details.
3.021	Fire Alarm Report now includes the last successful download date/time for each relevant clocking terminal. This would help to indicate if a particular clock has been offline for some time and therefore the data in the report may not be up-to-date.
3.025	The Quick Authorise feature can now be configured to only display specific rates.
3.029	New Totals By Employee report – new blanks option and by group dates (Cost Centres)
3.031	New 'Description' box added to the Connections screen
3.032	Automated Cascade Employee Import
3.034	When booking an absence selecting 'Only Scheduled Days' depends on a daily rule's 'Absence Exception'
3.035	Absence reasons are now colour coded in tree

3.045	Audit log entries increased to 20,000
3.046	Delete All button added to templates tab for Biostation
3.048	Pay History User Access**??
3.049	'More Dates' button added to the Cost Variance Report
3.055	Show Planned Cost Centre on a Biostation when an employee clocks  Employee mobile Phone Number now shows on Rota Day Planner
3.057	Hanvon template management: Implemented management of admin users
3.064	Email Address option added to the Employee Report
3.066	'Email' button on reports after they have ran (Focus Enterprise Only)
3.073	Max Shift Length defaults to 16, instead of 18 in system setup  Employees Report can now have more than 8 columns  Biostar integration : Access Group option available on clock tab in employee details screen
3.077	Hanvon downloads now contain cost centre numbers (Work Codes)  The day planner on the rota now contains a group filter  On the Rota you can now Right Click and "Clear Recent Rules List"
3.082	Payroll Report Option: Shift Times. On the detail report instead of Daily Rule Code, shows start and end of shift  The fire report can now be filtered by cost centre
3.091	New 'Shift' button when editing an employee clocking on a timesheet
3.092	Missing Clocking and Target Hours Exceptions and Workflows become active after max shift length  Rota Day Plan: Ability to delete a template has been added
3.095	Locking a timesheet saves the colour of the shift column  Locking a timesheet saves the hover text when mousing over the timesheet.
3.096	New Focus desktop Icon
3.098	Rota Day Plan: Only locks the group and employees that you are editing

3.099	Timesheet performance fix (3.095-3.098) Locked timesheet rounding tooltip saved
3.103	Global Daily Rule added to Pro, in System Setup->Rates Red percent text on rota over budget Group Option "Rota Enabled", for hiding groups on the Rota Form Find feature for scripts Script Download Improvements Tachomaster Download Script Support
3.104	Download : Allows multiple clockings for an employee at the exact same time if the types are different
3.110	Rota: Confirm message and audit when you delete a lot of records (>10) Rota: Right click context menu is arranged more logically
3.113	Rota: Split shifts always show without having to hover the mouse
3.117	New: User Field Type: File, will import a binary file into the database
3.121	Employee Tree Optimization and Grouping Options Rota Optimization
3.124	DPI scaling related fixes
3.126	Enabled backup and restore of Biostation Templates table  Tweaked Rota capture range to 3 hours before start, 12 after  Rota day plan: Loading a template now adds to what is already there + right click, clear option
3.137	ZK Terminal Template 'Get All From Reader' speed and reliability improved in Clock Utilities
3.138	Employee Report - added Daily Rule columns
